

Bubble Protection for Your Hard Drives

Bubble Protection

With the LaCie Coat line of bags for your hard drives, you've got a great new way to stylishly protect your favorite gear. Designed by Sam Hecht, the designer behind our popular "Little Disk" line of drives, the Coat bags bring a chic, sophisticated style to technology accessories—one that our customers have come to expect.

Reversible

One of the most inventive aspects of the LaCie Coat line of bags is its reversible, flexible design. If you change your mind, you can change your bag from a bubble pattern to sueded fabric, simply by turning it inside out. You'll still get the same level of protection and safety for your hard drive, but you'll be able to customize and change your bag at your leisure—it's like having two bags in one!

Secret Accessory Pocket

A hidden pocket on the inside of the bubble protection helps your LaCie Coat hold even more of your secrets. However, if you don't have any tangible secrets, it will also easily and reliably hold your cables and accessories.

A Complete Range for Your Drives

With the two different sizes in the LaCie Coat line, it's easy to find the one that's right for you. Choose from two sizes, both of which are compatible with most hard drives on the market. For example, our 2.5" bag is perfect for drives like the LaCie Little Disk, and our 3.5" bag is ideal for products like the LaCinema Classic. LaCie Coat bags are available in gray, red, black, and orange, and whichever one you choose, you can be confident that your LaCie Coat offers superior protection for your drive.

LaCie Coat, Design by Sam Hecht
